KINETIC CIVIC EDUCATION

Program Guide
KCE

We Advocate, You Learn, & the Community Prospers

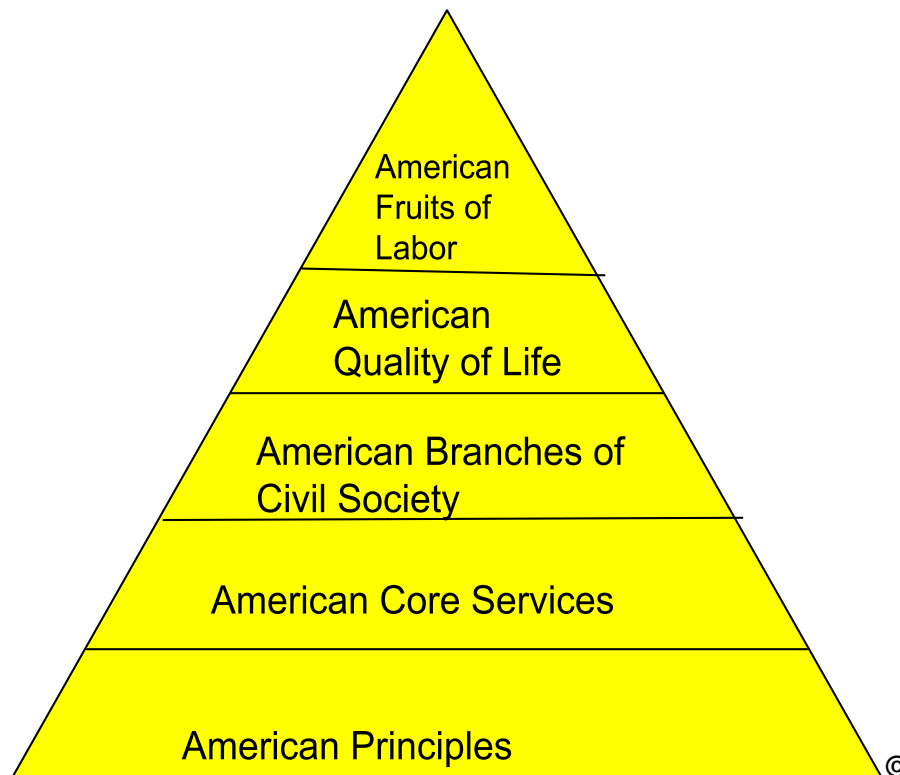

“Your attitude towards 2024 will change the future of democracy. The Sixth Congressional District has had its fair share of consequences due to upper level mismanagement in the city, state, and federal government. Kinetic Civic Education’s goal is to be a clear asset for American souls in this nation who need help deciphering their rights so they can advocate for themselves and to decrease the need to rely on others for services they can provide to their own household.”

- Founder Kimberly Cruz

Kinetic Civic Education

This organization is a proven critical thinking program that allows users of the guide to interact with Queens and orient themselves depending on their circumstances as an American Citizen, American Long-Term Resident, and American Visitor. We advocate, so others learn, and therefore the community prospers.

Developed by a Yale University and Bronx High School of Science Alumna Kimberly Cruz, you will receive updated support from an intersectional perspective with a five-part Knowledge Tree™. We build on your individualized booklet which you will receive on your first day, and the orientation packet generic version is free online for you to see what you may encounter in the KCE Queens Orientation Program.

The Pyramid of Life

The basics will be covered such as understanding the foundational American principles that have shaped our history around communication, compatibility, accountability, and family structure. We will also discuss the core services which are City Services, Health, Insurance, Technology, and Education. Third, we will cover the branches which will cover the six ways people interact in civil society through death, military, family life, rest, workplace, or schooling. The leaves will allow civilians to be able to see the impact when humans are not in a vacuum and we need to focus on the quality of our food, sanitation, water, air, and energy crisis when critically thinking about the best policy decision for our land. Finally the fruits of labor are the people the Knowledge Tree produces. American Born, American Made, and American Visitors may be good or bad apples which is imperative to clearly create boundaries so as to not ignorantly group people together when the boundaries of the law of the land applies to them differently.

This is a comprehensive approach to orientation by properly sustaining long term civic education by emphasizing kinetic energy that is ever moving between each agent of change. You will work one-on-one with members of your KCE team to develop as an exceptional leader in Civic Education. You will be able to organize your life, learn about trauma, policies, and academic research to support claims about the new direction 2024 will shape up for you!

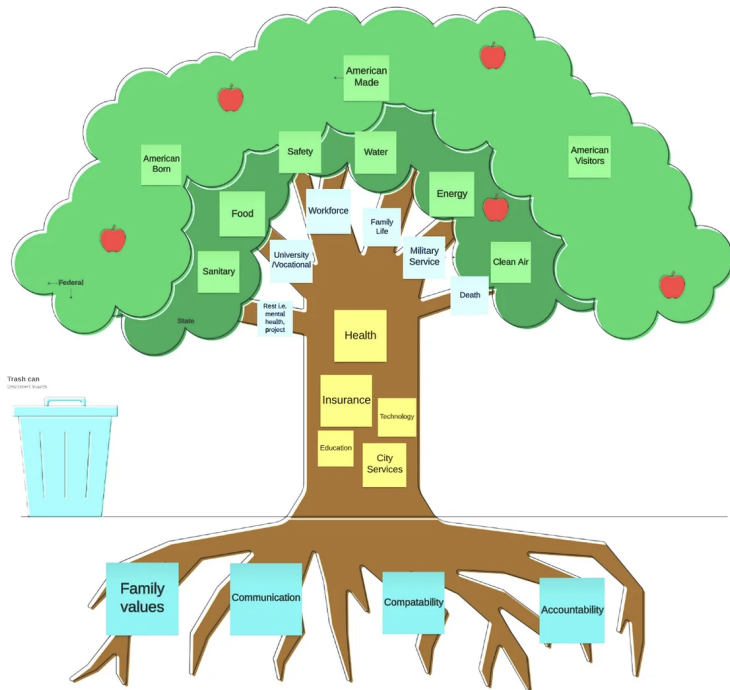

The KCE Queens Orientation Program is designed to ensure civilians **you are not alone**.

The Orientation Program was developed as a fourteen month long journey to decipher the issues of the city when artificial intelligence was released to the public, the Ukrainian War was at an apex entering the winter season, and the migrant crisis was rampant where city officials were making inhumane promises when the current state does not have proper management to successfully provide guidance to thousands of new arrivals. We have collaborated with academics, elected officials, teachers, community members to be able to create a powerful sustainable tool for the Sixth Congressional District. Most participants will have a different perspective of their reality once they are able to comprehend the actual mechanics at play in the government.

How do I get started?

Each participant will complete a fifteen minute initial call with KCE. This call is to allow you to understand the aims of the program, what you truly need to create long term and short term plans to be able to achieve, and lay out that specific 2024 timeline. Once you have completed the call then we will invite you to the program. Upon receiving your program fee, you will begin your individualized journey or you may join a class with peers. Your KCE specialist will work with you to map out your desired timeline for this arduous civic journey.

Program Summary

“ to preserve the communities that enter and exit the U.S. Sixth Congressional District of New York when the judicial and executive branches are removing the power of The People of the United States, we, The People, state the problems of democracy and fill in the gaps for our people with the emphasis on primary source research, local updated partnership, and active advocacy.”

Participants are part of the KCE community which is 772,000 residents in the Sixth Congressional District with professors from high quality institutions, professionals

who are sincere and able to tell you the inside scoop on what the process in the real world is actually like, and be able to advocate for yourself with the fury of a seasoned advocate.

Overview:

- Kinetic Civic Education is based on Kimberly Cruz’s experience as a person of color who has become a leader in every community she has joined.
 - Kappa Kappa Gamma President
 - President of Club Colombia
 - President fo STAND with Comfort Women
 - <https://yaledailynews.com/blog/2021/03/22/cruz-koh-comfort-women-and-the-ongoing-struggle/>
 - <https://yaledailynews.com/blog/2021/04/29/feature-the-struggle-against-fiction/>
 - <https://remembercomfortwomen.org/stand-with-comfort-women-the-struggle-for-justice-yale/>
 - <https://globalist.yale.edu/in-the-magazine/passing-down-the-heart-of-the-survivors-stands-activism-to-commemorate-the-comfort-women-issues-at-yale/>
 - Mitigation Intern at The Federal Public Defender’s Office
 - Research Assistant at Yale Law School under Alice Miller with the Global Health Justice Program advocating for Sex Workers' rights and lessen discrimination in the judicial branch [Fall 2021-December 2022]

- “Public health literature provides clear evidence of the harms of sex work criminalization,” [said Alice M. Miller, Co-Director of GHJP](#). “In integrating those insights with a nuanced understanding of the power of prosecutors and the practical functioning of the criminal legal system, this handbook emphasizes how research institutions can leverage interdisciplinary work in support of, and in collaboration with, change efforts led by sex worker rights movements.”
 - https://law.yale.edu/sites/default/files/area/center/ghjp/documents/exercising_discretion-a_handbook_for_advocates_and_district_attorneys_navigating_the_possibilities_and_impacts_of_non-prosecution_policies_in_the_context_of_sex_work_criminalization.pdf
 - Commercial Litigation Assistant at Scarola, Zubatov, Schaffzin
 - Family Equality Intern to provide support for LGBTQ+ foster children and lobbying in Congress for support John Lewis’ Every Child Deserves a Family Act
 - The John Lewis Every Child Deserves a Family Act (ECDFA) would prohibit any child welfare agency receiving federal financial assistance from discriminating against any potential foster or adoptive family on the basis of religion, sex, sexual orientation, gender identity, or marital status. In addition, ECDFA would prevent discrimination against any foster youth because of their sexual orientation or gender identity.
- During the program, each author will work with the KCE team designed to support and develop your critical thinking skills to be able to direct your efforts on completing a goal in 2024.
- A Customized Timeline
 - There are diagrams, readings, conversation starters that will allow participants to complete the process in ten hours.
 - Each week we will dedicate one-on-one conversation with the KCE team
 - Live community intuition sessions to learn more about the community at large
 - Weekly office hours with specialists around more in-depth development in a specific piece of the pyramid.
- At the end of the ten hours, you will be able to design your own life and position with more tools under your disposal.

Commitment:

Example: 1 hour/week

- Tuesday - Small Council
- Tuesday - Action item
- Tuesday - Larger council, every 24th of the month, bigger event showcases project team work to the public
- Tuesday - Action item

The day of the week can be different but the idea is that

1. Once a month you are in community (localized)
2. Twice a month you are in action mode

3. Once a month you are in community (at large)
4. This will allow you to engage actively with the material (separate) from the one hour a week you engage with your individualized material. This all depends on your schedule which will be part of the initial call.

Most alumni of the program spend more than 1-3 hours a week due to the homework and level of engagement they want to have. Treat this program as a survival guide to Queens and that you have to study or be left behind. The world is changing and technology is not being regulated in a timely manner so our critical thinking skills will differentiate our value in the new machine world.

Pricing: For community groups and schools: You may decide to provide the classroom and it is a flat rate \$400 for ten weeks or you can price it for the individuals in your organization and it will be \$300 flat. Individuals can base the rate on their status. We do not ask for proof of status but we do fill out a contract to protect all parties and it will be explained in your native language or the language you feel comfortable using. Email: kineticciviceducation@gmail.com for more questions and arrangements.

American Born: \$40/hour. If you are a Queens resident you get \$30/hour.

3-month program(Queens): \$300

3-month program (Non-Queens): \$400

American Made: Immigrants can request language advocacy and we will translate these resources with an expert so you can get the help you need. You are allowed to barter with a service that you have medium-high quality skills or pay \$40/ hour. If you are a Queens resident you get a discount which then amounts to: \$30/hour.

3-month program(Queens): \$300

3-month program (Non-Queens): \$400

American Visitors: \$15/hour but you have to gather with more people at least five

3-month program (Queens): \$150

How The Modern Civic Education Program Works

Mission Statement

Kinetic Civic Education, an organization focused on streamlining kitchen table issues into New York's Sixth Congressional District, home to 772,000 people immersed in 800 languages, inspires grit, growth, and hope for the Sixth through primary-source advocacy. We evaluate the gaps that the legislative branch of the government is not addressing especially when the executive and judicial branch have made changes that affect the Sixth Congressional District. By setting up active campaigns and thoughtful-advocacy sectioned resources around Health, Technology, Insurance, City Services, and Education, we are able to teach people how to sustainably organize their long term plan as well as actively engage with their community. Active campaigns such as Drones and Ethics, Queens Library and access to First Amendment Rights, Artificial Intelligence in Schools, Inadequate Healthcare Coverage Accountability, and CT-NY Highway safety allow community members to engage with primary sources to provide grit, growth, and hope for the Sixth. Partnerships with larger local community organizations collaborations have allowed us to update network contact information for people to be able to advocate for themselves.

Robert Moses Flushing Meadows World Globe Monthly PLEA.:

The Sixth is the most diverse piece of land with a wealth of information not being emphasized enough. Starting January 24, 2024, Kinetic Civic Education will provide the public a space to complain about not getting your complaints heard and plea your KCE (CASE) to advocates who have intersectional experience.

Values

01

Giving Chai

The magnificent effort of efficient targeting messaging to correct the wrongs committed to an enclave can be seen with the Jewish lessons around “giving chai”. My father always admired the Jewish culture because of the idea of a phoenix rising from the ashes with the wing strength provided by the support of the community. The Jewish culture achieves the importance of providing social capital, materials, or physical cash to leaders, organizations, and community members so that their efforts can fill the unseen gaps in each household.

Our households all have their internal secrets and customs that are not shown to the rest of civil society. Family values on what causes shame, glee, and melancholy cannot be transparent at all times in this ever changing society Post-COVID and Post-AI. We have to set roots on what we can all come to an agreement and use as an outline to set rules for all. We have to allow those discussions to occur efficiently and effectively. Gather the leaders monthly, centralized the information to the government as a council for us ALL with transparent communication.

In such a modern world, where there are robots being revered for demonstration of the extent to our human capabilities or the robots are being exposed for potential destruction of civil society, we shall meet as an assembly and apprise, both continents and governmental elected officials, of the issues that have impacted the community from an international standpoint to a domestic standpoint.

02

Bond

I learned about strong bonds with my Arab community throughout my travels. Every decision we make, even the decision to throw away food, can be a moment of impact for another individual. In the Arab community, specifically in Morocco, I saw people regularly putting bread on the side of the street in places where it was safe to eat again. My host family told me: Moroccans do not waste bread because bread is a source of life. You see bread on the streets because it is an energy source for people who are vulnerable on the street. Why throw away food that is actually providing someone else energy to make their next decision?

This bread bond reminded me of my grandmother Abuelita Rosa, who died being an active worker in her business. She made fresh bread in the morning everyday until the age of 92. When my father was growing up, their family had the town restaurant, and when my grandfather passed away my grandmother adapted to her circumstances and specialized her skills in all that is pan (bread). This symbol was that you should never stop being active and if you are lucky enough to find your passion then the activity will make you stronger, you will lead a healthier life, and allow yourself to have clarity for the next big decision.

What I have seen in this particular value of the bond to the self or to the community is that you have to be a friend to others and be a friend to yourself. Find your passion and provide people with some support without knowing this stranger-neighbor. Across cultures we are using language to communicate our values and our life missions tailored to the individual self. A bond set with the dough to make something beautiful for the next person.

03

Knowledge

The Asian community has taught me the value of investing in your mind. In Flushing, New York, you can find hundreds of prep schools focusing on pooling their efforts to get your child into the best school so that they can be on the path to prosperity. In China, GaoKao (高考) is an intensely studied exam, sole criterion for entrance to Chinese Universities, and is taken by Chinese students in their final year of high school; students are taught at a very young age the importance of this exam and emphasize how it will “determine” your career choices. To an extent, this is true. If we tell everyone that “just anyone can make it into higher institutions”, we will actually create more harm in BIPOC* communities than more good. We have to show people the time and effort that is needed and expected amongst wealthier peers and those around the world. Who are we actually competing with in the international and domestic world market? Are there topics that I need to learn at a younger age so I am not behind in my Adult Stage? Which books, journals, and newspapers are objective and which ones are subjective?

We must value the exposure to quality-google-search terms. An individual who wants to learn about finance may fall into traps where low quality to mid-quality actors will provide information and the government does not have a business or nonprofit institution to vet these resources. The Better Business Bureau: a private organization that provides the public with information on businesses and charities, handles consumer complaints about firms through their .A+ to F rating system. Local bureaus in the United States, Canada, and Mexico fall under the Council of Better Business Bureaus—a self-regulatory organization. If we expose terms, organization names, and agency titles to the public in a more deliberative way , we will allow others to become stronger advocates. People do not want to rely on slow services when maybe their investment can lead to a desired outcome. BIPOC communities are just tired of investing and then getting lower quality help than their peers, and lower quality results than they were promised/expected.

Therefore, Kinetic Civic Education is a center that allows people to dissect their life and file a timeline complaint to keep record of their self-activism, finding better quality resources in New York City and at the same time notifying KCE which resources are lacking or do not exist. Self-regulate low-income communities with high quality guidance because if these communities do not have physical cash capital, they are still breathing and have time to focus on their familial empire – their household. Join Kinetic Civic Education to connect and make 2024 a better and more appropriate space for your existence.

WE ARE HERE TO HELP YOU IF YOU WANT TO BE PART OF THE PROGRAM.

Active Activism

We are using our bodies to collect primary sources and connect with KCE to bring more awareness for legislative change!

November 17, 2023 7:45 pm

"Books saved my life"

We rely on centralizing information on the actual capabilities of the services promised to us as American Citizens, American Long-term Residents, or American Visitors, instead of relying on religious organizations, ethnic enclaves, gender affiliations when you first enter into an active stage in life:

- [ADOLESCENT]
 - 0-18
 - 18-25
- [ADULT]
 - 25-40
 - 40-65
- [SUPER ADULT]
 - 65-90
 - 90-120

There is a better way to set a clear standard for the U.S. Sixth Congressional District of New York where 772,000 are interacting with the migrant crisis, rise of artificial intelligence, socio-economic and political tensions. We must uphold our American principles to hold the branches of government accountable for the people.

Kinetic Civic Education to keep the government in check by balancing the information to be civilian-centered and powered by our primary sources. Many agencies keep civilian information private and do not allow people to have possession of their information. To combat this, Kinetic Civic Education has created an organization that fills in the gaps when international politics stretches thin our district's services.

Five Active KCE Campaigns

1. CT-NY Highway Safety

- a. We are creating workshops to understand advocacy from an active standpoint. If you have a vehicle, want to learn about regulations as technology advances, or if you believe you can contribute to the group. Please join.
- b. CT-15 should have a re-design because at least eight families have died on the same strip near Exit 57,58,59,60,61,62,63. The only way action is taken is when people make enough noise. Help us make this strip safer since it is a popular highway that connects New York, Connecticut, and Massachusetts.

2. Inadequate Health Coverage Accountability

- a. The Sixth Congressional District is home to diverse individuals from all ages and backgrounds, therefore, it is imperative that we secure a functioning centralized system to keep accountable the procedures, medication, and complaints made on behalf of the patients in Queens. We have such a decentralized network that when moments of crisis occurred, Elmhurst hospital was on national news throwing out bodies due to capacity. We shall not make national news again for the inefficiency that can easily be addressed. There has been a long history of city officials making decisions that are not addressing the high needs of the community. Our high need is to keep health coverage accountable and bring the power back to the people when doctors have their hands tied to the institutions that employ them.
- b. What are your opinions about this topic? Have you felt like your medical team has made errors? Have you felt like there was a better way to track your health records? Has there been moments when you believed you had patient rights but they were not heard. Tell me your thoughts.

3. Artificial Intelligence and Schools

- a. We are focusing on the release of CHATGPT to schools and the parameters that have not been properly set by Congress and the Department of Education. We have let 917,000 public school students interact with artificial intelligence and new migrant children who have been exposed to different cultural norms in their home country. We must prepare all children for success and provide efficient support to school staff who have a hard time staying afloat.
- b. We will discuss privacy issues, plagiarism, critical thinking skills, conversations about post-Affirmative Action, and much more. We have been in contact with Superintendents and Education Councils but we need to engage with more.

4. Queens Public Library and First Amendment

- a. We are actively working with the library systems and are in communication with Director Lu of the Queens Library system to create strategic ways to triage the services provided and encourage community members to see the value of 64 branches of QPL at your disposal. Attached is a document describing more information on the library and Kinetic Civic Education's efforts. Please join if you have a strong passion for education, QPL, first amendment rights, and willingness to learn.

5. Drones and Ethics

- a. We are at the age of modern technology where we are introducing these devices to the public at alarming rates. We can discuss this as EVs, flybikes, scooters, skateboards, flying drones, all items that have capabilities to remove your

freedom by making one wrong move. We must understand the technology and our rights that extend to this item.

- b. When we are owners of a device with great capability, we must be held responsible when a consequence arises. For example, if a fourteen year old uses a drone, breaks into a home through a window, and takes a picture. What are the repercussions there and who should be held responsible and who will explain the rights to this child who may be tried as an adult. Invasion of privacy, breaking and entering, harassment, assault, and other charges may potentially label this child as a danger by just a simple mistake an adult failed to explain.
- c. Therefore, we have to actively be critically thinking about the implementation of such devices to the public when children and the super adults are the most vulnerable.

Give me a true season.

And then judge.

That is representation.

For God,

For Country,

and For the Sixth.

- Founder of Kinetic Civic Education,

Kimberly Cruz

November 24, 2023 PLEA: The CT-NY Highway Safety

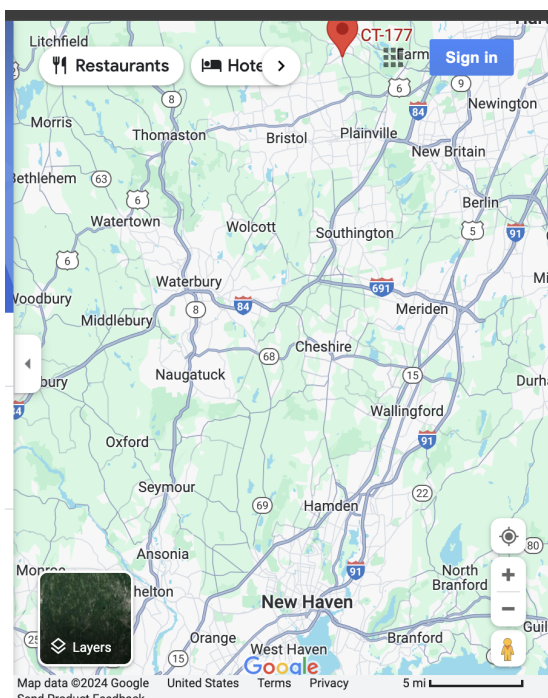

Outcomes: We are suing the state of CT in behalf of road safety to get a civil engineers second opinion, Yale Daily News journalists, Yale EMT volunteers, as well as Yale Alumni have been notified and are collaborating on the project to lessen the death toll on a re-design issue of CT-15 near Exit 59-67.

Background: The next four pages will show you a letter Kimberly Cruz sent the YaleWomen nonprofit organization where women who graduated from Yale provide a professional and social space to obtain fellowship and guidance from peers. On this day, November 24, 2023

- According to data from the [Connecticut Transportation Institute](#), there have been four fatal crashes on Route 99 since 2015. Three of those crashes happened in the same 1100-1200 block of roadway.
- “Silas Deane Highway and so many other of our roadways are just seeing people driving way too fast, not a couple miles an hour over the speed limit, but 10 to 20 miles an hour over the speed limit,” Josh Morgan of the Connecticut Department of Transportation said. “We’re seeing people texting and driving, watching videos while they’re driving, things that are taking their focus off the roadway.”
- “The data paints a pretty bleak picture on what’s happening on Connecticut roadway,” Morgan said. “Those are human lives that are being lost on our roadway, and really the vast majority are due to three things: speeding, distractions and impairment.”
<https://www.nbcconnecticut.com/news/local/drivers-call-for-safety-measures-after-2-serious-crashes-in-12-hours-on-wethersfield-highway/3158223/>

News <https://www.youtube.com/watch?v=aWoutwvFw9Y> at 3:56

Crash that killed two people at around 7 o’clock route 177 near Bristol Farmington, car crashed into a tree and the three children to the hospital. Why is Route 177 important because it intersects with Route 10 which intersects with CT 15 at Exit 61. These attached roads have a history of highway fatalities.

Hello YaleWomen,

My name is Kimberly Cruz, I am Yale Class 2022, Pierson College. I am the founder of Kinetic Civic Education, an organization focused on streamlining kitchen table issues into New York's Sixth Congressional District home to 772,000 people immersed in 800 languages. Here is my website for more information on that: <https://www.kimberlycruz.me/>

Happy Thanksgiving! I am asking my network of strong powerful women to help me in a time of need. I have advocated for the last ten years of my life on various issues but on the eve of The Game, on November 17, 2023 at 7:40 pm I survived a near fatal car crash, on CT 15 near exit 60, fifteen minutes away from Pierson. By some miracle, all three people in this crash survived but we have injuries that need to be heard so others do not experience a similar or worse fate. How can we activate our networks to help a Yale and change Connecticut safety on the highway?

I do not have a degree in journalism, I do not have my desired JD/PHD degree yet and I do not have any governmental power at this moment, but I do hold myself to the very most ethical and practical approach on primary source gathering. I lead by example so I led as an advocate.

Tldr: "Rob flew, so please check on Rob... I am on some railing, I could have F**** died", please officer, I want to check on Rob, he could have gotten hurt..."

Rob was my roadside assistance person, a 23 year old white male, and Kesnel, a 33 year old Black man who hit the side of my car. There is a fourth vehicle but the police did not do their due diligence and have not followed up on tracking this vehicle who could have caused the whole crash. As seen in the pictures I am lucky to be alive and I am so very grateful to be here writing in pain while the back of my head burns, my neck and spine experiences excruciating pain, so much pain from the knee and below that I want to cut off that limb to rest from the pain. However, none of these symptoms stopped me from advocating for others while I simultaneously advocated for my own needs.

I would love to share more but I come here to emphasize: my Yale and Bronx Science mentorships prepared me for disaster. I did not know these individuals but truly I want you to know them and hear our story.

"A little empathy can go a long way".

- 1) If anyone is interested in highway safety, there is a pattern on this highway that has not stopped the death of countless individuals who have been parked in a "safe designated areas" on this specific highway and have been killed when another car crashed into them (so far I have read about eight families in the last three years).
- 2) If any YaleWomen recommend any personal injury attorneys who are intersectional and can parse out the trauma as well please contact me kimberlycruz.b@gmail.com or 646-895-4909. Also, just to make a new Yale friend.
- 3) Any journalists who can explain the whole process of "getting the whole story"; from the eight articles I have read about the incident, they do not mention the state of my Nissan

Altima which ended getting hit from the left side, back, and pushed into the truck flatbed so the front of my car impacted the back of the tow truck head. I almost flew off the 25 feet drop solely by the impact of these vehicles. The articles focus on Rob which is fine but there were two other bodies who were also very hurt– Kesnel and my body– which were not mentioned to the same extent. Another instance of POC being erased from major events– maybe intentionally, not intentionally, or there are methods of information collecting that may be improved.

- 4) Are there people who are interested in medical advocacy and trying to analyze how to correct procedures in professional fields to take into account the totality of the circumstances, human biases, and proper documentation to prevent other accidents in the future.
- 5) Legislatively: any connections to people in CT with governmental power or other organizations that care about highway safety or other issues you may see fit. There is Vision Zero in New York City but I am not sure if there is a sister organization. Any wisdom would be much appreciated.

Transcript of the day Final Destination saved me: The Initial Minutes

"Im gonna... quickly– fucking christ okay– yes please, Im scared, I'll step away from the vehicle, some other car was behind and he left, I did not take his vehicle number, I do not know if he is the one who hit me but there is one that is directly...and I am on a tow truck and Rob flew so please check on Rob, okay, Rob is over there and is talking to a civilian, he is on the road okay, and I am scared, I am on the railing on, I could have F**** died, f**** G*** holy shit, holy shit, please officer I want to check on Rob, he could have gotten hurt, one second I have to get away from this car, F***, what happened,

[Shouting over to the car that hit the Nissan Altima at a right angle on the left side]
Guy get out of the car
Guy get out of the car
Get out of the car
Get out of the car

WHY? → another person

Because we are smashed in, get away from it, Rob flew over there, my roadside assistance guy, he flew over, okay, I called 911.

He is over there, where is he at?

He flew over bro

What do you mean, aren't you happy you are alive? Did you see what happened?

Am I happy I am alive? My little brother died in a car accident last year. Am I happy I am alive? Yeah, I am going up here because...

What is your name? What is your name?

Kesnel Minard.

Kesnel Minard.

I am going up there because of a car accident event. I am going up here and my little brother died of a car accident and I am going right here.

We have to step away from these cars so we can be safe. Please step away.

What was going on?

My name is Kimberly Cruz. My name is Kimberly Cruz. Your name is what?

Kesnel Minard

Okay, my blood type is A-, what is your blood type?

I don't know.

You need to know your blood type. Okay. Well I need to get away from these cars. I am scared of Rob ** starts crying** Rob is over there.

Yelling:

Rob, are you okay, are you bleeding? We called 911.

What do you mean he flew?

He fucking flew.

But like where was he at?

Crying: Right there, talking to me. He was here talking to me and he was just right here talking to me.

He didn't get hit with your car.

I don't think so because he is over there. He is over.

So he jumped over?

No, he fucking flew.

Where was he talking?

I was on my driver's side and he was on the passenger side trying to open my door but my car

He was standing there.

He was literally here, I wasn't even on the tow truck. Yeah, and I guess your car or someone hit you and I don't know what happened and then it pushed my car and I could have died *** starts hyperventilating ***

Please stay away from the car, it might explode, you know your motor is there, think about it, just get away from it,

I shut it off.

I don't know if mine is off.

What! It's not off?

I don't f***** know. I almost died so I don't know but I don't think its on but I don't f***** know.

(yelling to Rob) Rob are you bleeding?

Is he okay? I have first aid in my back.

Oh my fucking god, oh my god. What is this?

[getting closer to the accident]

It smells like smoke, it smells like smoke.

December 24, 2023 PLEA: "THANK YOU, QUEENS, GIFT 3"/ The Nine Days of a New Generation

Kimberly Cruz was giving thanks to all the community's religious places of worship in the Sixth Congressional District such as Greek Orthodox Churches, Hindu Temples, Mosques, Christian Churches, and Buddhist Temples. Not only places of worship but places where people gather for fellowship.

December 19, 2023 Santa Claus and Talent Show at the Queens Library if you want festivities without the stress come to the East Flushing Library 196-35 Northern Blvd and see this cozy area become your home.

December 21, 2023 We will be able to complain to the police about public safety. Founder of Kinetic Civic Education, Kimberly Cruz wants you to join her for tea outside of the Flushing Library steps to hold the government accountable. There are new projects such as the Casino, Hotel, Residential building, and Stadium that are currently being protested by the Queens community across ethnicities but the people who are truly going to be affected are the families and children who live in the shadow of the projects. These projects will be at Mets Willets Point.

ALL LANGUAGES ARE WELCOMED. WE WILL HAVE DIRECT TRANSLATIONS AVAILABLE.

Can we make this a big public safety hearing with the police and Latin prayer during La Novenas? Join us in multilingual and multicultural conversations about these [issues](#)

December 23, 2023

Santa Claus and talent show and raffles. Please join us at METS stadium entrance after school around 4 pm (please let the adults in your life aware of your surroundings aware of your location) to get into a raffle for tickets to various sports games in New York City.

I hope to see you there! The organization Kinetic Civic Education¹ would love to include more kitchen table conversation in everyday activities supported by New York City, especially the library system that is failing and crumbling in front of our eyes. Please join the monthly PLEA to make KCE (CASE) for others who cannot advocate for themselves. Call or text (646) 895- 4909.

"THANK YOU, QUEENS, GIFT 3"

January 24, 2024 PLEA : HELLO COMMUNITY, From the South to the Great North

Kinetic Civic Education has been invited to share ideals and programming to the community members of Jamaica, Queens. This event will take place January 20, 2024. Although not part of the Sixth Congressional District, participants in this area benefit the most as a centralized place for worship, civic education, and legal pursuits. Grace Episcopal church is across the street from the Department of Health, McDonalds, Family Court, Rufus King Park, and a school nearby. We will present the programming to the community and hope to create a long lasting relationship.

Background: Pages 21-31 will demonstrate the material for the individual that will be customized and will be a skill the individual will have by the end of the program: to create timelines for the issues in their life. Active advocacy means planning ahead of time, creating plans B and C, and executing the plans in a timely manner with efficiency at the forefront.

Outcome: We hope to have more participants and provide them the services once they join Kinetic Civic Education. They will obtain a free book, a free individualized orientation packet, as well as a KCE mentor who will guide them for ten weeks.

<p>Roots: Family Values, Accountability, Compassion, Communication (1 Class)</p>	<ul style="list-style-type: none"> ● We discuss news on how the U.S. government has updated its laws across the three branches that check and balance the powers of the federal government ● The promises made to you by the principles of the government ● Keep agencies in the local government that are supposed to provide promises services up to date records so we can protest with accurate primary information ● Be compassionate with others by actively engaging in. cohort with others on what local services there are and connect with leaders ● Make sure language is not a barrier to entrance to any agency
<p>Trunk Services: City Services, Health, Insurance, Technology, Education (5 Classes)</p>	<ul style="list-style-type: none"> ● Learn how city services and the local community board can help you ● If you need help understanding or recording injustices over your health ● Insurance is a fickle concept that seems daunting to take on your own, work with peers on understanding different types of insurance society believes you should have ● Technology advances; Artificial intelligence will become an issue if people do not believe in their neighbors ● Education should be accessible to people especially post Affirmative Action
<p>Active Stages: Rest, College/Vocational School, Workplace, Family, Military, Death (1 Class)</p>	<ul style="list-style-type: none"> ● Understanding how one enters society and interact with the economy in four active and two passive ways: four active ways to enter into the economy and there are two ways you live by being a passive actor. ● You engage on the daily with the economy, in an <i>active</i> way [Rest, College/Technical, Workplace, Family] ● You are an actor that has more done to you as you serve the economy[Military and Death] ● This in turn effects how you view politics which is what we see in the leaves of the tree. ● Depending on the Active stage you are in, will change your perception of the state and federal government.
<p>State Level (1 Class)</p>	<p>The state government has many elements that we need to decipher on when, where, how, why, and whether we know what to do after we complain to the state.</p>
<p>Federal (1 Class)</p>	<p>The federal government has many elements that we need to decipher on when, where, how, why, and whether we know what to do after we complain to the state.</p>

Self Reflection: Project focus (1 Class)	You choose a community project in the Sixth District so you can shadow in your mentorship.
Timeline	Where does your activism lie on the tree? How can KCE help you get implement a successful plan?

HEALTH ALERTS

WE DO NOT HAVE PROPER ACCOUNTABILITY IN THE MEDICAL FIELD

Undercovered

The Queens Borough President had a person from a local nonprofit present to the Civic Association about the low number of people who have registered for medicaid and medicare. We need to make sure Americans in New York are aware of their networks that attempt to communicate to them the urgency.

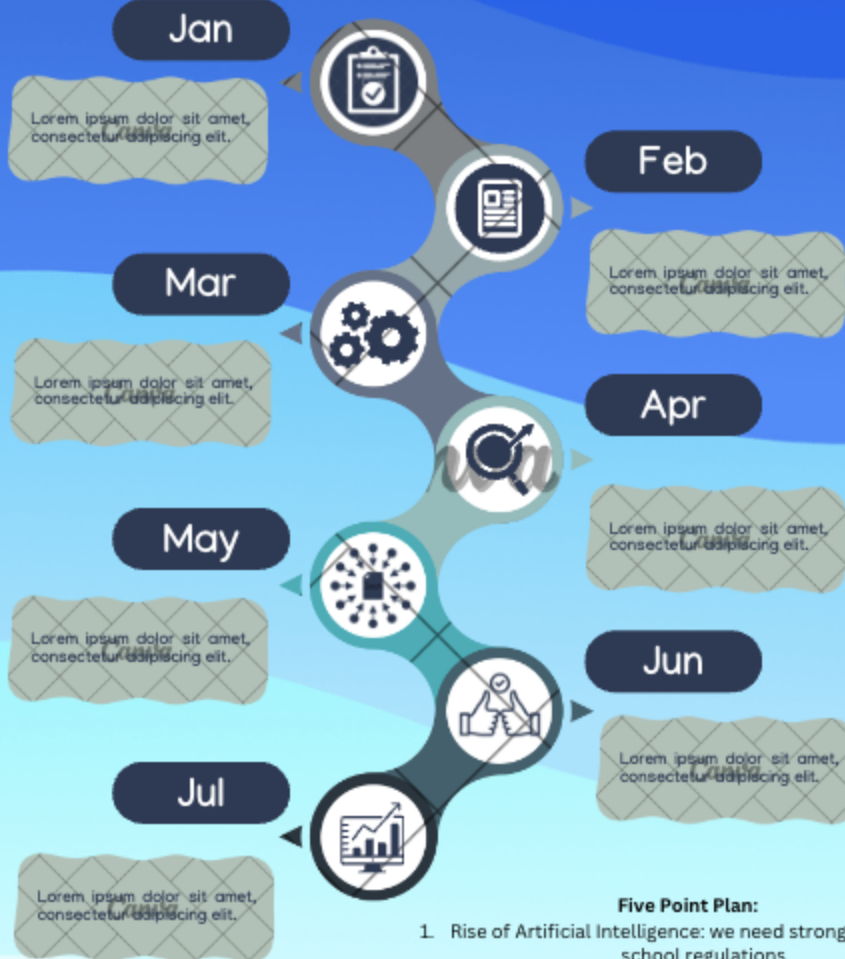

The Governor of New York has stated a public health emergency for the elderly who need coverage as well as the young ones who may not be covered depending on their housing abilities, awareness, and support network.

In Case of Emergency

We are in the midst of floods. We saw the lack of proper care from hospitals

NEW YORK CITY COUNCIL TIMELINE

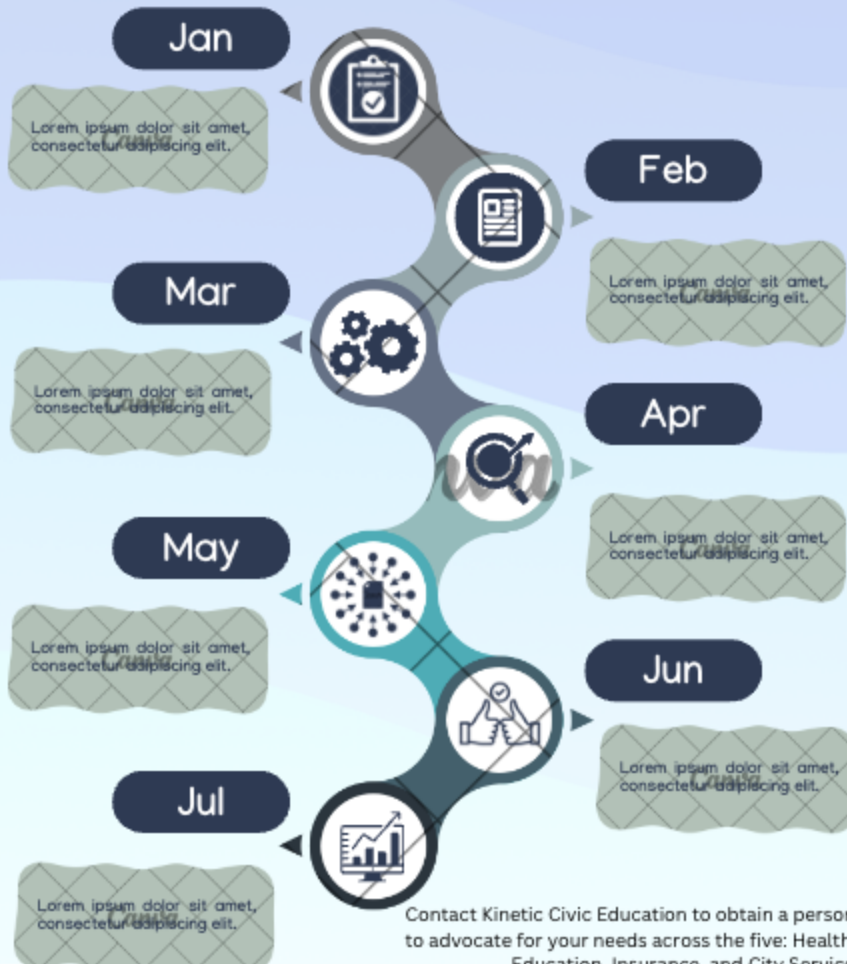

*Officials will be invited and noted.
 *Civic Leadees will be invited and noted.
 *Nonprofits will be invited and noted.

Five Point Plan:

1. Rise of Artificial Intelligence: we need strong and reliable school regulations
2. Unregulated vehicles breed low and high levels of crime
3. Combat and protect against the Utility Monopoly
4. Post Riker's Island new Kew Gardens jail complex
5. Create a feasible transparent tracker for low level crimes

NY STATE ASSEMBLY AND SENATE TIMELINE

CREATING AN EFFECTIVE BUSINESS PROPOSAL

Clearly Outline the Value Proposition

Clearly articulate the value and benefits your product, service, or solution brings to the client. Highlight the unique selling points.

Understand the Client's Needs

Before you start writing your proposal, take the time to thoroughly understand the client's requirements, goals, and challenges.

Provide a Solution-Oriented Approach

Present a clear and comprehensive solution to the client's problem or challenge.

Showcase Your Expertise and Experience:

Demonstrate your expertise and credibility by including relevant case studies, success stories, or testimonials from satisfied clients.

Present a Professional and Well-Structured Document

Pay attention to the visual presentation and formatting of your proposal.

Be Specific and Realistic with Budget and Timeline

Provide a detailed breakdown of the project cost, pricing, and payment terms.

INTRODUCE MATERIAL

Adolescence (1) Roots Concept Map

Name:

Date:

Family values

- Updates on Supreme Court cases that need to get a response from us on the local level
- House Speaker Biography to understand who is third in line (EB)
- Sexual Education should expose a standard

Compatibility

- The local community board effectiveness
- is anyone in your group is not happy because services are identifying identity incorrectly?
- Are my interests reflected in society?

Communication

- Did the DMV provide an adequate translator or did the security guards discriminate?
- If there were a mentally disabled person who needed help would they get successful help?

Accountability

- Are there any new metrics on how we can complain about a teacher?
- How do we address a misunderstanding so it does not go any further?

Trunk Evaluation

PROJECT NAME: Cosmopolitan Intergenerational Concept Map

TIMELINE: October 31, 2022- October 30, 2023 - 365 Days **BUDGET:** \$8,000 - 10,000

GOALS:	<ul style="list-style-type: none"> • Be able to attend a four year university • Get my masters • Become a LNP.
MOVEMENT:	I have reached out to Columbia University, MIT, and Stony Brook but I do not know the differences between a state school and a private university. I called people but some offices say different financial responsibilities even though I was promised a full-ride.
EDUCATION	<ul style="list-style-type: none"> • Get into Stuyvesant • Get above an 80 on my Spanish test <p style="color: red; text-align: center;">Promote the organization's services, programs, and resources:</p> <p>Mentorship with young professionals fresh out of college, connect to shadow mentors, get into a high-quality internship to provide free labor, get exposed to fellowships that center around public service that exist but I am not aware of</p>
HEALTH	<p>Understanding how insurance is effecting my 64 year mother in a year</p> <ul style="list-style-type: none"> • If she needs extra care, how much is the insurance covering and if we take out loans will it be under her name or my name to cover her health expenses, and are there any programs or currently high functioning nonprofit that can provide me with more guidance.
HEALTH	How do you budget proactive health measures about centralizing my medication and keep records of all my doctor's visits?
TECHNOLOGY	How can I stop my tracking location because I suspect my neighbor or landlord is harassing me? Is NY State actually fighting for my rights.

Silent Protest from a Flushing Native to centralize
information for the U.S. Sixth District

QUEENS: 365 DAYS (YEAR ONE) REVIEW

ABOUT KCB

Kimberly Cruz, a native Flushing New Yorker, Bronx Science Alumni and Yale University graduate ventured into a 365-day, **Year One** campaign. This Two-Year focus is to set standards on evaluating the government and the resources provided to those in the U.S. Sixth District which encompasses neighborhoods such as College Point with a large migrant population, Kew Garden with a large Orthodox Jewish Population, and Flushing a majority Chinese.

ADVOCACY

- DMV SECURITY GUARD DISCRIMINATION
- COMMUNITY BOARD
- IDENTIFYING THE SPECIFIC BARRIERS FOR PEOPLE TO INTRODUCE NEW IDEAS
- FOOD KITCHEN ALLOCATION
- THE FIRE DEPARTMENT EXCESSIVE FORCE
- A.D. 27 SPECIAL ELECTIONS
- YOUTH ORGANIZING IN THEIR RESPECTIVE ASSOCIATIONS
- POST AFFIRMATIVE ACTION ADVOCACY
- PRISONERS' VOTING AND HEALTH RIGHTS
- ASYLUM SEEKERS + DOMESTIC VIOLENCE

YEAR ONE REPORT

OCTOBER 31, 2022-NOVEMBER 1, 2023

About the Founder of Kinetic Civic Education: Kimberly Cruz

Kimberly grew up in Queens, and is ready to take a different approach to civic education during this modern age of misinformation and disinformation.

This website is to provide an independent hard working space of keeping city agencies accountable with the power of primary source collection. In a paid partnership with a local rising artist, founder of Franklin Comics, we are striving to bring unity to the races across Queens unifying ideologies that are internationally being torn apart but misunderstood locally on how this affects socioeconomic status. Contact kimberlycruz.b@gmail.com or 646-895-4909

As a response to the Supreme Court's affirmative action ruling, we want to proceed with providing support when the gaps are not being filled. Judicially we have been stripped of racial and gendered rights; legislatively we must keep the government accountable to give them back.

Words from the Founder Kimberly Cruz:

" I want to improve the definition of transparency between government officials and the public by exposing the inconsistencies in language, jargon, and promises with Kinetic Civic Education. For example, make sure kids in under-resourced communities get access to scientific thinking by exposing them to high quality google search terms to provide them a concept map on how they can get to their goal. The vision is to promote long term career help by focusing on creating an individualized toolkit for the Youth to carry with them for any civic battle.

I chose to be a warrior at a very young age. I saw my mother bleed after she sliced off two fingers in the kitchen in front of me twenty two years ago, with insufficient aid from our "guaranteed" health resources. However, that is not the trauma I am referring to; the injustice my family faced for decades when professionals in the medical and legal field do not have proper mechanisms to finish the job they promised under oath, and not forgetting low income populations are not well aware of their rights. My father and mother saw that their attorney was not equipped for the case against Flushing Hospital and they made their autonomous choice to find better representation but the procedural aspect of justice led to another U.S. family facing long term consequences.

This was in 2002. At this time, my mother had to face two surgeries and was pregnant with my younger brother, and this case ceased to exist in 2007 because an attorney failed to provide my parents adequate representation and did not fill in the gap in which his status, as a legal professional, should have shielded my parents from falling through the gaps of the legal system.

Alas, my father's pleas to obtain his primary, secondary, and the vast amount of evidence from this attorney, was met with an agreement that favored the professional who had a legal license to understand the civil rules of procedure. My parents did not fully understand when their new attorney called, and why the evidence was never transferred over. This is why I fight; my parents advocated for themselves, used city services to locate the right help, and the court transcripts allow you to replay history but the importance of record keeping without outside manipulation is the focus of this organization.

As a Kinetic Civic Educator, the main focus is to centralize the knowledge I gained at Bronx Science and Yale University to funnel more low-income students into higher education so they can be effective leaders of tomorrow. I am the product of the American Dream and the internship focusing efforts around all the skills I gained through my networks, failures, and exposure through casual conversations will allow them a safe space to work with another person in their Adolescence Stage entering their Adult Stage with a fresh set of eyes, grateful for the opportunity to use my mentors to pay it forward.

Since I am currently still working on this project, I will try to focus ahead of time to emphasize that low turnout in the polls is actually going against freedom of speech. I have seen how persistence results in proper determination in outcome and I have 2024 election hurdles but I believe the Sixth District will be able to plead their KCE and make a systematic change to this white supremacist model.

We focus on the 50 officials becoming available for the PLEA with other civic leaders, religious leaders, and others solely kept accountable to the Community Call: The of the Sixth. The 24 of every month, we communicate in person, in Flushing Meadows. An Adolescence Stage internship: The Flushing Meadows Beacon, Kinetic Civic Educators, will provide students a way to advocate for themselves, for their families, and for their future generation. The tips of how we can enter the Adult Stage protecting our trunk of five: City Services, Health, Insurance, Technology, and Education by figuring out the consensus amongst the generation to set the norms for their Adult Stage transfer into Rest, College/vocational school, Family, Workforce, Military or Death. Within the Adult Stage you have phases but you will be interacting into the system by these six and will use the five trunk markers to set high quality boundaries around the discussion of what else should be addressed for experts to know where we need help."

Topics:

The Civic Education Club will provide basics on understanding your rights under:

- 1) Medical Rights;
- 2) Freedom of Speech;
- 3) City Agency Complaints;
- 4) Education Attainment;

- 5) Safety on the Streets (the potential rise of crime from unregulated e-bikes);
- 6) Energy Monopolies (the monopoly of Con-Edison in the age of electric cars and lack of regulation);
- 7) International relations: the war with Ukraine and conversations around NATO, the political issues in Palestine and Israel, rise in racist politicians, coups affecting minorities;
- 8) Nuclear Weapons;
- 9) Alliances with Asia: ASEAN, South China Sea, new USA, Korean, Japan alliance against North Korea and China;
- 10) Environmental Issues: Right to Clean Water, Climate Change, and the lack of infrastructure the country has POST-COVID, Shark attacks, micro plastics affecting animal behavior, the heat affecting coral reefs;
- 11) Satellite Access, Commercialization of Space, Space Exploration;
- 12) Challenges to Democracy: rise in arms violence in Latin America, Central America Unifying, El Violator Eres Tu Campaign on sexual violence;
- 13) Misinformation and Disinformation: democracy failing in African nations, the alt-right rhetoric, alt-left rhetoric, the social media space as a new society and the laws of governance;
- 14) Public Health Crisis: Rise in COVID cases and other bacterial infections effecting the North East;
- 15) Social Justice: discussing the closure of the inhumane conditions of Riker's Island but providing an efficient program on regulating the next jail-complex holdings across five boroughs that will not be overseen by the federal government and may be overlooked by the *newness* and lack of understanding of these contractual obligations to these complex.

In addition, discuss the federal rights we held on to deeply such as the right to abortion and affirmative action with the caveat of emphasizing mental health rights. All pertaining to these altered ideologies that are misunderstood across the United States of America citizen-perspective spectrum.

THE 21ST CENTURY FIGHT IS HERE AND WE NEED TO BE GIVEN THE PROPER VETTED-BY-EXPERTS TOOLS TO LEAD OUR FAMILIES AND FUTURE GENERATIONS TO *LIFE, LIBERTY, AND THE PURSUIT OF HAPPINESS.*

THOMAS JEFFERSON

" WE THE PEOPLE. THEY DECLARE THAT THE CONSTITUTION DERIVES ITS POWER NOT FROM A KING OR A CONGRESS, BUT FROM THE PEOPLE THEMSELVES"

What is so special about this KCE Queens Orientation Program?

This is a program dedicated as an ode to the people of the Sixth Congressional District. People of all ages have asked for guidance and many do not have the support in various fields of life. Kimberly Cruz was born and raised in the United States and she believes the True American Dream has been tainted by bigotry and deliberate misinformation campaigns which affect the quality of life of all American souls. To hope for a Better Tomorrow we must become the Best of Tomorrow. Lead Kimberly Cruz and join Kinetic Civic Education.
